F-1 OPT Eligible | Available June 2026

PROFESSIONAL SUMMARY

Full-stack engineer with 4+ years of experience building multi-tenant hybrid mobile and web applications using Angular, Ionic, and Spring Boot. At TCS, developed and shipped a customer-facing financial services app used by 10K+ users across the UK, creating a reusable application framework adopted by multiple client projects. Experienced in frontend architecture, RESTful API integration, and mentoring junior developers. Completing M.S. in Computer Engineering at Virginia Tech (GPA: 3.8).

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, C++

Frameworks: Angular, Ionic, React, Spring Boot, Node.js, Flask, HTML5, CSS3

Tools and Testing: Git, GitLab, Postman, Jira, Figma, Agile/Scrum, JUnit, Jest, Jasmine, Karma

Databases: MySQL, MongoDB

PROFESSIONAL EXPERIENCE

System Engineer | Tata Consultancy Services, Pune, India

Nov 2020 – Jul 2024

- Developed Angular/Ionic hybrid mobile application for a UK-based financial services client, building frontend modules, UI components, and API integrations for a product serving 10K+ users.
- Integrated 30+ RESTful API endpoints on the frontend, implementing token-based authentication flows including route guards, HTTP interceptors, and session management.
- Optimized backend API performance by adding conditional logic to serve only mobile-specific data and queries, eliminating redundant processing shared with the web application and significantly reducing response times.
- Architected reusable application framework (project structure, authentication, base UI components) adopted by 2 additional client projects, reducing initial development time for new engagements.
- Led frontend team of 4 during final year, conducting code reviews, pair programming sessions, and internal training sessions that improved code quality and onboarding speed.
- Monitored production logs during releases and incidents, identifying and resolving issues to minimize service disruption.

Lead Software Engineering Intern | Shifting Waters Leadership Institute, VA

Jul 2025 – Sep 2025

- Sole technical owner of organization's web platform: led requirements gathering, technology selection, UI/UX design in Figma, development, and deployment while working directly with the CEO. Mentored one junior team member on development workflows.
- Built responsive, mobile-first website using WordPress and Elementor Pro, implementing WCAG accessibility standards, Google Analytics tracking, and SEO optimization.
- Automated program and service form generation into structured spreadsheets for executive reporting, and designed Slack-based task management workflows for the distributed team.

TECHNICAL PROJECTS

Zero-Knowledge Password Authentication | Circom, Node.js, Cryptography | [\[Link\]](#)

Jan 2025 – May 2025

- Built secure authentication system using zero-knowledge proofs with Circom circuits and Poseidon hashing for privacy-preserving credential verification without exposing passwords.
- Developed Node.js backend handling proof generation and verification pipeline with end-to-end testing of the cryptographic workflow.

Personal Budget Management System | Python, Flask, PyQt6, MongoDB | [\[Link\]](#)

Aug 2025 – Nov 2025

- Built full-stack desktop application with Flask REST backend, MongoDB persistence, and PyQt6 interface supporting user authentication, CRUD operations, and interactive spending dashboards.
- Implemented MVC architecture with lazy-loaded database queries and data visualization for personal finance tracking.

EDUCATION

M.S. Computer Engineering | Virginia Tech, Blacksburg, VA | GPA: 3.8/4.0

Aug 2024 – May 2026

- Coursework:** Deep Learning, Machine Learning, Computer Vision, Information Security, Large-Scale Software Development

B.E. Computer Science and Engineering | SGB Amravati University, India | GPA: 8.89/10.0

Aug 2017 – Aug 2020
